

CLEAN ENERGY Ltd

Clean Energy Ltd. is a spin-off company of CERTH/ ISFTA, which was established in March 2010, based on the multi-annual experience and know how of the Centre's research personnel, acquired from the accomplishment of R&D projects related to the energy and environment sector, with specialization on bioenergy. The shareholders of the company are researchers of ISFTA in the field of energy and environment.

Scope of the company is provision of services and technical support on applications related to utilization of alternative fuels including biogenic and waste derived fuels. In this framework some indicative activities of the company are the following:

- a) Laboratory analysis, characterisation, classification of biogenic and waste derived fuels and determination of the respective biogenic content
- b) Technical support on the design and operation of installations exploiting biomass and waste derived fuels for energy production
- c) Consulting and Engineering services to third-parties regarding the aforementioned or similar areas.

Up to date, Clean Energy Ltd is appointed with the following projects:
